

BACKWASHING INSTRUCTIONS

Backwashing is an important part of taking care of your pool. Many water issues can be avoided with proper care and attention to the filtration system. Backwashing reverses the flow in the filter and sends water out of the waste line. Make sure valves are open or hoses are rolled out.

CAUTION!!

Be sure the pump motor is **SHUT OFF** when you begin.

1. Turn pump off and move the multi-port valve handle to backwash.
2. Turn pump on and let run approximately 2 to 3 minutes or as needed.
3. Shut the pump off and move the multi-port valve handle to rinse
4. Turn the pump back on and let rinse for 30 seconds.
5. Turn pump off and move the multi-port valve handle to filter.
6. Turn pump on.
